10. The Family Tree

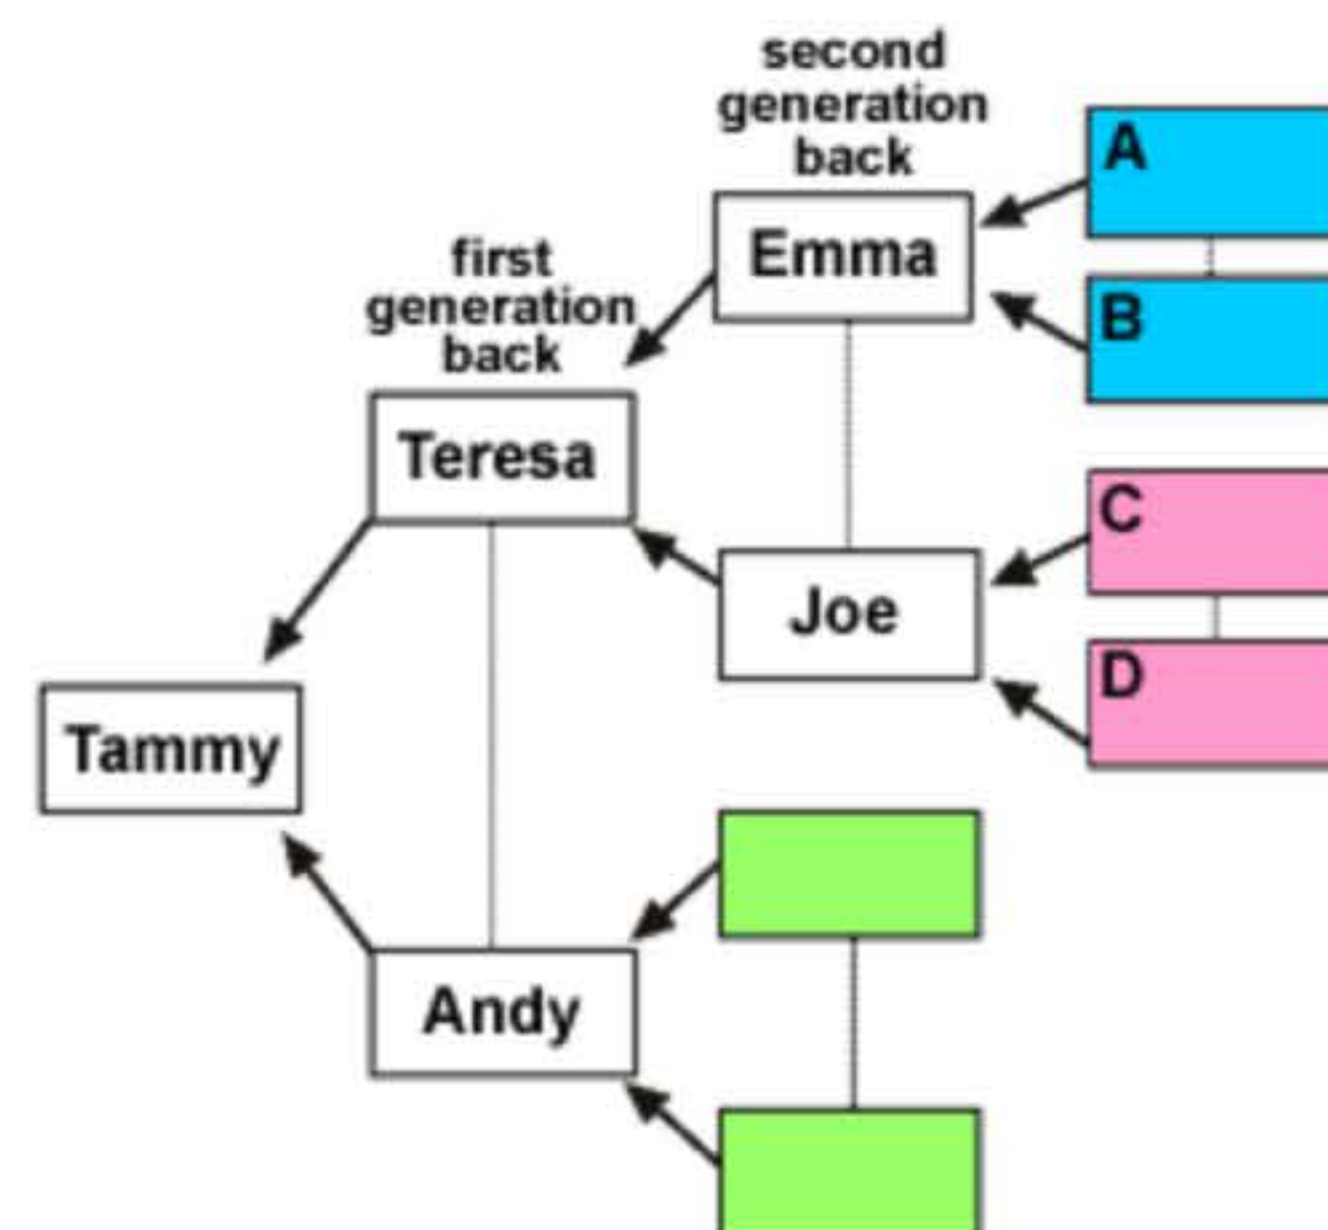

All over the world, many families keep records of their ancestors. Ancestors are family members who came before your parents, like your grandparents, great-grandparents, etc.

Tammy asked Grandma Emma to help her make a family tree. With her grandmother's help, Tammy was lucky enough to get the names of three generations of her family. A generation is a set of people about the same age.

Tammy's parents are shown on the chart. Teresa's mother and father are also shown on the chart. Joe's parents were called Mary and Tom. Emma's mother and father were called Sofia and Antonio. They died when Tammy was a little girl.

Andy's parents are Angela and Camilo. Andy never met his grandparents and could not remember their names.

Note about the chart: for each couple, the female should appear in the upper box (Teresa is above Andy, and Emma is above Joe, etc.).
