

CONTENTS

INTRODUCTION – COMPONENTS OF ORGANIZING THINKING	1
CHAPTER 1 – BLACKLINE MASTER GRAPHS	7
Lesson Plan Form	8
Compare and/or Contrast Diagrams	9
Interval Graphs	14
Transitive Order Graphs	19
Flowchart Diagrams	23
Central Idea Graphs	28
Branching Diagrams	35
Class Relationships Diagrams	39
Matrix Diagrams	45
CHAPTER 2 – LANGUAGE ARTS LESSONS	49
VOCABULARY DEVELOPMENT	
Describing Size	50
GRAMMAR AND LANGUAGE MECHANICS	
Nouns and Verbs	55
Statements and Questions	57
Parts of Speech	59
RESEARCH AND LIBRARY SYSTEMS	
Newspapers and Magazines	62
History or Fiction?	65
Types of Books	67
LITERATURE	
<i>Aesop’s Fables</i>	70
<i>Charlotte’s Web</i> : Describing a Character	74
<i>Charlotte’s Web</i> : Drawing Inferences	80
<i>Charlotte’s Web</i> : Reasons and Conclusions	82
<i>Charlotte’s Web</i> : Describing the Plot	86
Describing a Story	89
“The Steam Shovel”	95
SPEECH	
Describing a Good Speech	100
I’m Listening	104
CRITICAL READING AND REASONING	
Describing Class Relationships	107
Main Idea and Supporting Details	112
CHAPTER 3 – WRITING	116
Writing Definitions	117
Writing Your Autobiography	121
Writing a Report	123
Descriptive Writing: A Common Object	126
Expository Writing: A Historical Event	129
Creative Writing: Dinosaur	132

CHAPTER 4 – SOCIAL STUDIES	134
SOCIAL INSTITUTIONS	
Draw Your Family Tree	135
GEOGRAPHY	
Neighborhoods and Cities	140
New England and the Southwest	146
Land Forms and Bodies of Water	149
UNITED STATES HISTORY	
Explorers and Discoverers	154
ECONOMICS	
Goods and Services	157
Producers and Consumers	159
Taxes and the Community	164
Checks and Money	166
Cashing a Check	169
Products from Oil	172
Needs and Resources: The Buffalo as a Source of Supply	175
POLITICAL SCIENCE	
What Government Does	179
City, State, and National Governments	181
CHAPTER 5 – MATHEMATICS	183
NUMBER OPERATIONS	
Using a Number Line to “Feel” Addition and Subtraction	184
Checking Subtraction	187
Finding a Mathematical Rule	189
Factor Tree	192
Common Factors	194
Reviewing the Greatest Common Factor and the Least Common Multiple	196
Value of Fractions	199
GEOMETRY	
Classifying Shapes	201
Describing Quadrilaterals	204
Classifying Shapes by Sides and Angles	206
GRAPHING AND MEASUREMENT	
Comparing Units of Measure	208
Effect of Inflation on Kids’ Buying Power	212
PROBABILITY AND STATISTICS	
Heads or Tails?	215
Do You Have the Right Change?	217
WORD PROBLEMS	
Writing a Flowchart for a Word Problem	220
CHAPTER 6 – SCIENCE	224
SCIENCE OBSERVATION	
Classifying Things	225

LIFE SCIENCE

- Comparing Living and Non-Living Things 227
- Contrasting Plants and Animals 230
- How Animals Move 232
- Life Cycle of a Plant 236
- How Seeds Travel 238
- What Part of a Plant Do We Eat? 242
- Fruit or Vegetable? 246
- The Four Food Groups 248
- Food Chain 250
- Meat-Eating and Plant-Eating Dinosaurs 253

PHYSICAL SCIENCE

- Solids, Liquids, and Gases 256
- Heating and Cooling Water 258
- Water Cycle 260
- Energy Changes 262
- Simple Machines 265
- Which Sound is Louder?..... 268
- Weather Observations 270
- Stars and Planets 272

CHAPTER 7 – ENRICHMENT **275**

MUSIC

- The Trumpet and the Tuba 276
- Comparing Number and Music Patterns 279
- Recognizing the Beat 282
- Describing a Musical Work 284

ART

- Elements of Design 287
- Describing a Picture 289

CHAPTER 8 – PERSONAL PROBLEM SOLVING **292**

- Short- and Long-term Goals 293
- The Effects of Watching Too Much Television 295
- Reducing Lunchroom Waste 297
- Do I Really Know It? 301

CHAPTER 9 – ANSWERS **308**

SANDRA PARKS (formerly Sandra Black) received an M.A. in Curriculum from the University of South Florida and did doctoral studies at Indiana State University. She provides staff development to schools across the country and serves as an educational consultant to the National Center for Teaching Thinking. She also conducts National Curriculum Study Institutes annually for the Association for Curriculum Development. Sandra Parks is the founding president of the Indiana Association for the Gifted.

HOWARD BLACK received an M.A. in Mathematics from Indiana State University and did doctoral studies at both Indiana State and Michigan State universities. He taught physics at Indiana University for 28 years and in 1978 received the Distinguished Teaching Award from that university. He currently teaches math and general studies at Bethune-Cookman College in Daytona Beach, Florida, where he was given the 1990 Award for Excellence in Teaching.

The authors appreciate the cooperation of administrators, teachers, and students in the academic excellence programs of Dade County (Florida) Public Schools. We also appreciate the efforts of the students and teachers at Backman Elementary School in Salt Lake City, Utah, who contributed to the classroom effectiveness of *Organizing Thinking* by field-testing these lessons. Special thanks to Kathi Anderson and Principal James DeNeff.

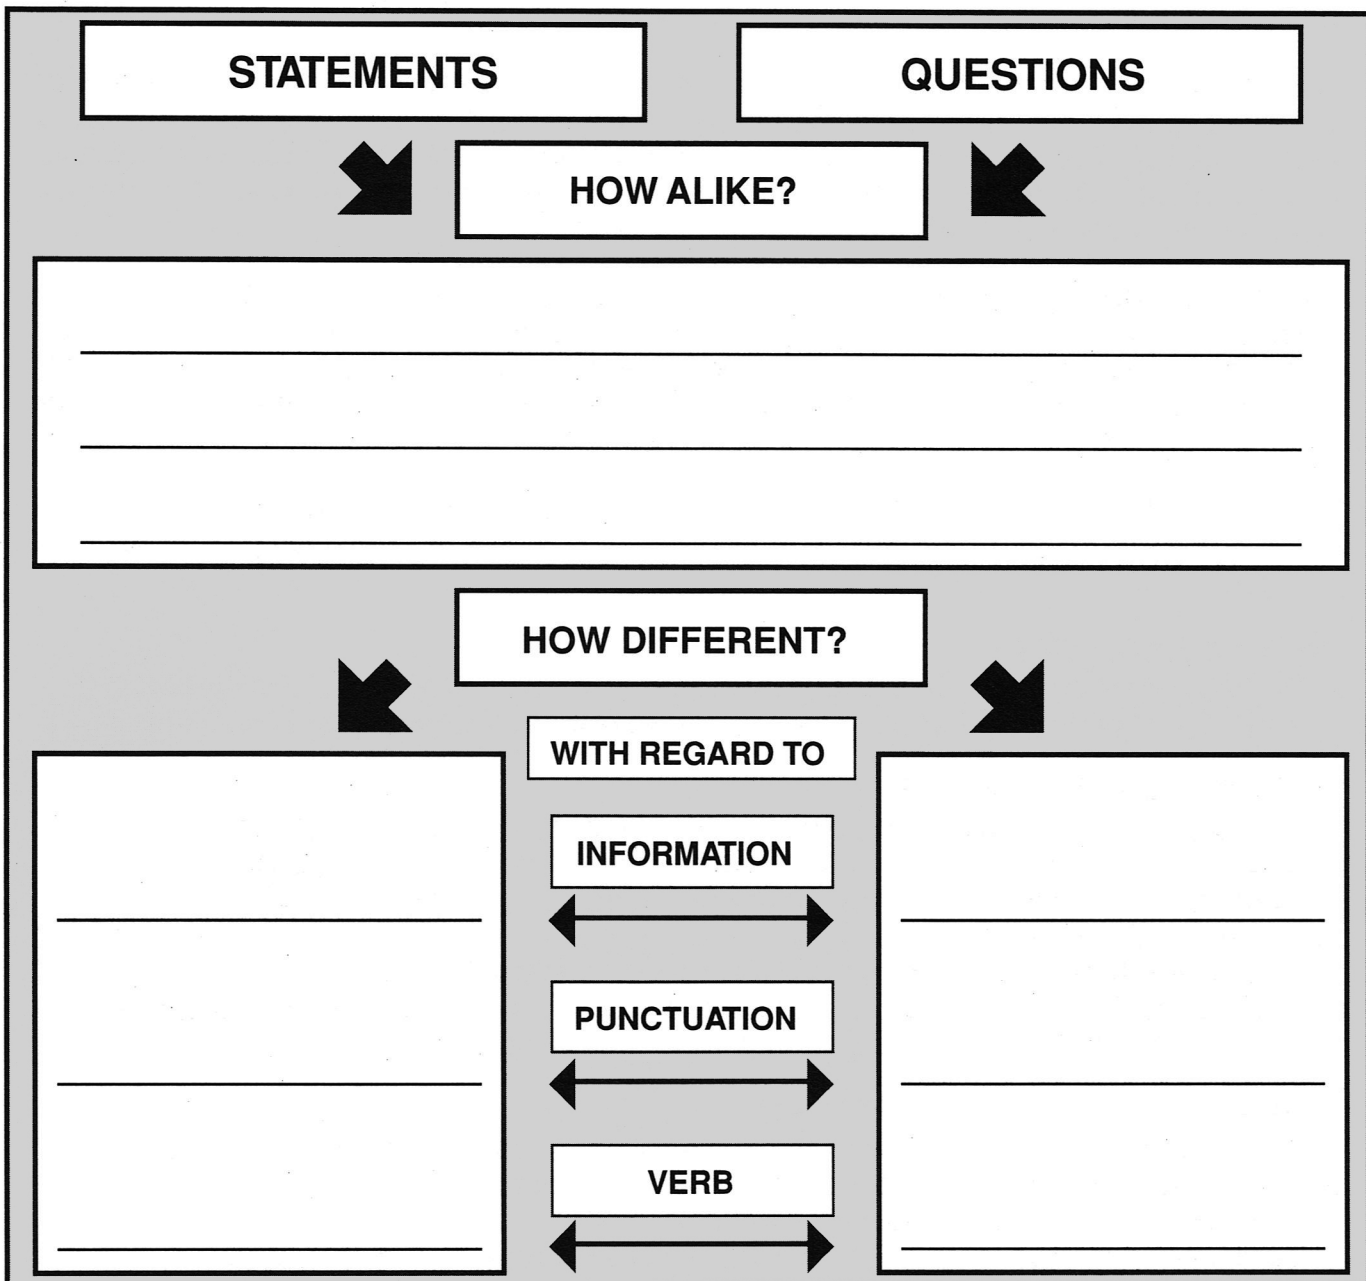

STATEMENTS AND QUESTIONS

DIRECTIONS: Use the diagram to show how statements and questions are alike and how they are different.

Statements and questions are kinds of sentences and tell whole thoughts. Both contain a subject and a verb and end with a punctuation mark. Both are used to give or get information. Paragraphs can have both.

Statements give information about people, places, things, or ideas. They always end with a period. The whole verb usually follows the subject; for example, "The motor is running."

Questions ask for information about people, places, things, or ideas. They always end with a question mark. The subject usually comes between parts of the verb; for example, "Is the motor running?"
